2010

Product Source Booklet

The Model Line at-a-Glance:

– Feature Reference Guide
– Common Features
– Trim Level Differences

Dear Sales Consultants:

This booklet helps you understand, present and teach your customers the key operational features. In this way, you end up educating your customers—helping them "take ownership" as they become acquainted with their new vehicle's features:

- **CONSIDER:** If you *coach* your customer so they have a "hands-on" understanding of how to operate a feature and then test them to make sure they actually can operate that feature, chances are good that the customer will understand the feature operation and how it functions. We know that some features do not function as they do on their current vehicle. Having customers "take ownership" of key features will make your job easier and increase customer satisfaction.
- **STOP AND THINK:** If you just *show* someone how the stalk-mounted windshield wipers and lights operate, once they get behind the wheel, they may not have a clue what to do. But if they physically operate these features, they take ownership. Then, you only have to "test" them a few times to make sure they "get it," which will make your "selling" job a lot easier and, again, increase customer satisfaction!

Good Learning and Good Selling!

Gary W. Major
Manager, National Sales Training

TABLE OF CONTENTS	2010
ECONOMY MODELS: Accent, Elantra, Elantra Touring and Sonata	
Electronics: Audio, Navigation, Bluetooth®	page 1
Comfort, Convenience	page 1
